

SEVIMLI

The trusted beauty marketplace for women in Uzbekistan: verified shops, a real community and an AI beauty consultant

TASHKENT · SEPTEMBER 2026 · LIVE PRODUCT

sevimli-production.up.railway.app

Women shop for beauty “blindly”

1

Counterfeits everywhere

Korean cosmetics are sold through Instagram and Telegram with no documents — an original is impossible to tell from a copy.

2

Trust is scattered

Advice and reviews live across dozens of chats, with nowhere to buy what is recommended: chats have trust but no shelf.

3

Marketplaces have no women's layer

Uzum and Yandex Market are a shelf without community or authenticity checks; Instagram shops have no payments and no buyer protection.

Community → purchase, in one place

Verified shops

Sellers prove official import with documents; every "original" item gets a unique code on a sticker.

Community

Reviews only from real orders, questions to the seller on the product page, post → "Add to cart".

AI consultant Sevilya

Builds a skincare routine from the real catalog and answers questions about the platform.

Davra — buy together

A circle of friends: from 500,000 UZS everyone gets -10% and one shared delivery.

Salons

Book manicure, makeup, massage like any product — no commission on bookings.

Loyalty

Points for completed orders, tiers and partner gifts that bring buyers back.

Running on a real backend — not a prototype

- Next.js 16 · React 19 · TypeScript
- PostgreSQL / Supabase, EU
- Server-side orders: prices and stock computed in the DB
- Row-level security for phones and orders
- Authenticity registry with check counter
- PWA · ru / uz

Sevilya — a live AI beauty consultant

A large language model grounded in the SEVIMLI catalog. You chat in your own words — she **understands your skin type and goal**, recommends **real products with prices**, builds a **morning / evening routine**, and answers about delivery, authenticity and Davra — in Russian and Uzbek. She says openly that she is an AI and never gives medical advice.

Real catalog

Personal routine

Chat history

Rate limits & budget guard

→ **cart**

a recommendation leads straight to a purchase from a verified shop

30 / 45 / 60 d

repurchase reminders for consumables
— planned for the Telegram bot

B2B

for sellers: ru/uz listing generation and draft Q&A answers — in the Pro plan

Built on trust

Authenticity by documents

- ◆ The seller uploads import documents; the “original” badge is set by the platform, never by the seller.
- ◆ Every package carries a **unique code**; on-site verification counts checks and catches cloned stickers.
- ◆ A confirmed fake means a permanent ban.

People, not ads

- ◆ Only buyers who **actually completed** an order can leave a review.
- ◆ Sellers answer questions on the product page — a condition of “verified” status.
- ◆ Prices are lower because sellers compete on the platform instead of paying bloggers.

THE OPPORTUNITY

A large market with no trusted destination

E-commerce in Uzbekistan grows at double-digit rates (the market leader reported over \$600M revenue in 2025), yet beauty lives in grey Instagram and Telegram shops. Our wedge is trust: authenticity, reviews from real purchases, AI-powered selection.

~18M

women in Uzbekistan — a young, mobile-first audience

25M

Telegram users in the country — our main distribution channel

**Tashkent →
regions**

launch in the capital, then Samarkand, Fergana, Andijan via seller shipping

Launch is free

Free for buyers, always. Free for sellers at launch: storefront, orders, community, Sevilya.

Later we earn from sellers: subscriptions and promotion — **no cut of sales**, several times cheaper than marketplace commissions.

From a Tashkent beta to 20,000 monthly actives

OCT 13-15, 2026

Tashkent beta

25-30 shops, 8-10 salons, 300-500 on the waitlist.

BY NOV 15

First metrics

300 sign-ups, 100 orders, Telegram bot.

DECEMBER 2026

Payments

Click / Payme, first paying sellers, 1,000 sign-ups.

2027

Growth

Plans, Yandex Delivery, Telegram Mini App, regions. Goal — 20,000 MAU.

Today: the product is live and founding shops are being onboarded.

Who builds it and what we are looking for

Husan Mirzabayev

Founder · product and technology.
Architecture, AI assistant, development.

Gulnoza Kodirxonova

Business and operations · sellers, salons,
legal, support.

Avazbek Akbaraliev

Backend · database, integrations, payments.

What we are looking for

- ◆ **Delivery partners** in Tashkent and the regions (Yandex Delivery, BTS Express and others) — for Pro/Premium plans from 2027.
- ◆ **Cloud infrastructure and credits** — analytics, recommendations, backup capacity as we scale.
- ◆ **Mentorship and community** — experience launching marketplaces and e-commerce in Uzbekistan.
- ◆ **Investment** to scale after the beta: sellers, regions, team.
